59TN6A **Infinity**® Two-Stage, Variable Speed 4-Way Multipoise **Condensing Gas Furnace** Series 100

Product Data

A11263

The 59TN6A Multipoise Variable-Speed Condensing Gas Furnace features the two-stage Infinity® System. The Comfort Heat Technology® two-stage gas system is at the heart of the comfort provided by this furnace, along with the Infinity variable-speed ECM blower motor, and two-speed inducer motor. With an Annual Fuel Utilization Efficiency (AFUE) of up to 96.7%, the Infinity two-stage gas furnace provides exceptional savings when compared to a standard furnace. This Infinity Gas Furnace also features 4-way multipoise installation flexibility, and is available in five model sizes. The 59TN6A can be vented for direct vent/two-pipe, ventilated combustion air, or single-pipe applications. A Carrier Infinity Control and Infinity Air Conditioner or Heat Pump can be used to form a complete Infinity System. All units meet California Air Quality Management District emission requirements. All sizes are design certified in Canada.

STANDARD FEATURES

- Infinity® System; compatible with single- and multiple-zone Infinity systems.
- All sizes meet ENERGY STAR® Version 4.0 criteria for gas furnaces: 95+ AFUE; AMACF electrical rating; 2% or less cabinet airflow leakage.
- Quiet operation. Compare for yourself at HVACpartners.com.
- Ideal height 35-in. (889 mm) cabinet: short enough for taller coils, but still allows enough room for service.
- Infinity Features—match with the Infinity Control for Infinity System benefits.
- Integral part of the Ideal Humidity System® Technology.

- Silicon Nitride Power Heat[™] Hot Surface Igniter.
- SmartEvap[™] technology helps control humidity levels in the home when used with a compatible humidity control system.
- ComfortFan[™] technology allows control of continuous fan speed from a compatible thermostat.
- · External Media Filter Cabinet included.
- 4-way multipoise design for upflow, downflow or horizontal installation, with unique vent elbow and optional throughthe-cabinet downflow venting capability.
- · Variable-Speed blower motor, two-speed inducer motor, and two-stage gas valve.
- · Self-diagnostics and extended diagnostic data through the Advanced Product Monitor (APM) accessory or Infinity User Interface.
- · Adjustable blower speed for cooling, continuous fan, and dehumidification.
- · Aluminized-steel primary heat exchanger.
- Stainless-steel condensing secondary heat exchanger.
- Propane convertible (See Accessory list).
- Factory-configured ready for upflow applications.
- Fully-insulated casing including blower section.
- Convenient Air Purifier and Humidifier connections.
- · Direct-vent/sealed combustion, single-pipe venting or ventilated combustion air.
- Installation flexibility: (sidewall or vertical vent).
- · Residential installations may be eligible for consumer financing through the Retail Credit Program.
- Certified to leak 2% or less of nominal air conditioning CFM delivered when pressurized to 1-in. water column with all present air inlets, air outlets, and condensate drain port(s) sealed.

LIMITED WARRANTY*

- 10 year parts and lifetime heat exchanger limited warranty to the original purchaser upon timely registration.
- Limited warranty period is five years for parts and twenty years for the heat exchanger if not registered within 90 days of installation.†
- * For owner occupied, residential applications.

†Jurisdictions where warranty benefits cannot be conditioned on registration will receive registered limited warranty benefits.

FEATURES AND BENEFITS

Comfort Heat Technology® feature — This feature with Adaptive Control is a proprietary function that promotes homeowner comfort through two stages of heating. This Carrier furnace offers a patented algorithm that continually monitors and adjusts furnace operation by looking at both current and past conditions to determine the most effective stage of heating and the amount of time to run each stage, every cycle.

Ideal Humidity System® Technology — The Ideal Humidity system actively controls both temperature and humidity in the home to provide the best comfort all year long. Other systems depend on heating or cooling demand to manage the moisture in the air. But, Ideal Humidity gives the homeowner the right amount of humidity day and night, even in mild weather. No other manufacturer can do this! Ideal Humidity saves energy, too. By keeping humidity under control, the homeowner can set their thermostat lower to stay comfortable and save energy.

SmartEvap ™ Technology — When paired with a compatible thermostat, this dehumidification feature overrides the cooling blower off-delay when there is a call for dehumidification. By deactivating the blower off-delay, SmartEvap technology prevents condensate that remains on the coil after a dehumidification cycle from re-humidifying throughout the home. This results in reduced humidity and a more comfortable indoor environment for the homeowner.

Unlike competitive systems, SmartEvap technology only overrides the cooling blower off-delay when humidity control is needed. Once humidity is back in control, SmartEvap re-enables the energy-saving cooling blower off-delay.

ComfortFan ™ Technology — Sometimes the constant fan setting on a standard furnace system can actually reduce homeowner comfort by providing too much or too little air! Comfort Fan technology improves comfort all year long by allowing the homeowner to select the continuous fan speed of their choice using a compatible thermostat.

HYBRID HEAT® Dual Fuel System — This system can provide more control over your monthly energy bills by automatically selecting the most economical method of heating. With HYBRID HEAT components, our system automatically switches between the gas furnace and the electric heat pump as outside temperatures change to maintain greater efficiency and comfort than with any traditional single-source heating system. The heat pump also delivers high-efficiency cooling in the summer.

Power Heat ™ Igniter — Carrier's unique SiN igniter is not only physically robust but it is also electrically robust. It is capable of running at line voltage and does not require complex voltage regulators as do other brands. This unique feature further enhances the gas furnace reliability and continues Carrier's tradition of technology leadership and innovation in providing a reliable and durable product.

Full-Featured, Communicating, Variable Speed Motors — Our ECMs (Electronically Commutated Motors) provide variable-speed operation to optimize comfort levels in the home year round; features such as passive/active dehumidification, ramping profiles, constant air flow and quiet operation. They can provide cooling

match enhancements to increase the effective SEER of select Carrier air conditioner or heat pump system, and feature the highest efficiency of all indoor fan motors.

Reliable Heat Exchanger Design — The aluminized steel, clamshell primary heat exchanger was re-engineered to achieve greater efficiency out of a smaller size. The first two passes of the heat exchanger are based on the current 80% product, a design with more than ten years of field-proven performance and success. These innovations, paired with the continuation of a crimped, no-weld seam create an efficient, robust design for this essential component.

The condensing heat exchanger, a stainless steel fin and tube design, is positioned in the furnace to extract additional heat. Stainless steel coupling box componentry between heat exchangers has exceptional corrosion resistance in both natural gas and propane applications.

Media Filter Cabinet — Enhanced indoor air quality in the home is made easier with our media filter cabinet—a standard accessory on all deluxe furnaces. When installed as a part of the system, this cabinet allows for easy and convenient addition of a Carrier high efficiency air filter.

4-Way Multipoise Design — One model for all applications – there is no need to stock special downflow or horizontal models when one unit will do it all. The new heat exchanger design allows these units to achieve the certified AFUE in all positions.

Direct or Single-pipe Venting, or Optional Ventilated Combustion Air — This furnace can be installed as a 2-pipe (Direct Vent) furnace, in an optional ventilated combustion air application, or in single-pipe, non-direct vent applications. This provides added flexibility to meet diverse installation needs.

Sealed Combustion System — This furnace brings in combustion air from outside the furnace, which results in especially quiet operation. By sealing the entire combustion vestibule, the entire furnace can be made quieter, not just the burners.

Insulated Casing — Foil-faced insulation in the heat exchanger section of the casing minimizes heat loss. The acoustical insulation in the blower compartment reduces air and motor noise for quiet operation.

Monoport Burners — The burners are specially designed and finely tuned for smooth, quiet combustion and economical operation.

Bottom Closure — Factory-installed for side return; easily removable for bottom return. The multi-use bottom closure can also serve for roll-out protection in horizontal applications, and act as the bottom closure for the optional return air base accessory.

Blower Access Panel Switch — Automatically shuts off 115-v power to furnace whenever blower access panel is opened.

Quality Registration — Our furnaces are engineered and manufactured under an ISO 9001 registered quality system.

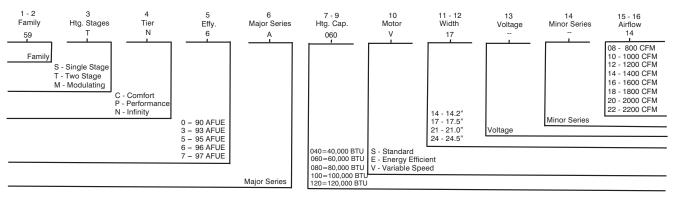

Certifications — This furnace is CSA (AGA and CGA) design certified for use with natural and propane gases. The furnace is factory-shipped for use with natural gas. A CSA listed gas conversion kit is required to convert furnace for use with propane gas. The efficiency is GAMA efficiency rating certified. This furnace meets California Air Quality Management District emission requirements.

MODEL NUMBER NOMENCLATURE

Not all familes have these models.

A11160

FURNACE COMPONENTS

REPRESENTATIVE DRAWING ONLY, SOME MODELS MAY VARY IN APPEARANCE.

ACCESSORIES

Venting Accessories		Part Number	Used With	Notes
Vent Kit - Through the Cabinet		KGADC0101BVC	All	1
Vent Terminal - Concentric	2-in.	KGAVT0701CVT	See Venting Tables	1
Venit Terminal - Concentric	3-in.	KGAVT0801CVT	See Venting Tables	1
Vent Terminal Bracket	2-in.	KGAVT0101BRA	See Venting Tables	1, 2
vent reminal bracket	3-in.	KGAVT0201BRA	See Venting Tables	1, 2

Condensate Drainage Accessories	Part Number	Used With	Notes
Freeze Protect Kit - Heat Patch for Drain Trap	KGAHT0201CFP	All	7
Freeze Protect Kit - Heat Tape	KGAHT0101CFP	All	-
CPVC to PVC Drain Adapter - 1/2-in. CPVC to 3/4-in. PVC	KGAAD0110PVC	All	-
Horizontal Trap Grommet for Direct Vent Applications	KGACK0101HCK	All DV Horizontal	-
Condensate Neutralizer Kit	P908-0001	All	6

Ductwork Adapter Access	sories	Part Number	Used With	Notes
Furnace Base Kit for Combustible Floors		KGASB0201ALL	All	-
	No Offset	KGADA0101ALL	All	-
Coil Adapters Kits - Painted	Single Offsett	KGADA0201ALL	All	-
	Double Offset	KGADA0301ALL	All	-
	14.2-in. wide	KGARP0301B14	14.2" Wide Furnaces	7
Return Air Base (Upflow applications) - Painted	17.5-in. wide	KGARP0301B17	17.5" Wide Furnaces	7
Return Air Base (Opilow applications) - Fainted	21-in. wide	KGARP0301B21	21" Wide Furnaces	7
	24.5-in. wide	KGARP0301B24	24.5" Wide Furnaces	7
IAQ Device Duct Adapters (side return) - Painted	20-in IAQ to 16-in side return	KGAAD0101MEC	20"x25" IAQ Devices	7
IAQ Device Duci Adapters (side return) - Painted	24-in IAQ to 16-in side return	KGAAD0201MEC	24"x25" IAQ Devices	7

Gas Conversion Acc	cessories	Part Number	Used With	Notes
Gas Conversion Kit - Nat to LP; Var-spd	Products	KGANP5201VSP	All	-
Gas Conversion Kit - LP to Nat; Var-spd	Products	KGAPN4401VSP	All	-
	#42 Natural Gas	KGAHA0150N42	All	4, 6
	#43 Natural Gas	KGAHA0250N43	All	4, 6
	#44 Natural Gas	KGAHA0350N44	All	4
	#45 Natural Gas	KGAHA0450N45	All	4
	#46 Natural Gas	KGAHA0550N46	All	4
Gas Orifice Kit	#47 Natural Gas	KGAHA1550N47	All	4
Gas Office Kit	#48 Natural Gas	KGAHA1650N48	All	4
	#54 LP	KGAHA0650P54	All	4, 6
	#55 LP	KGAHA0750P55	All	4
	#56 LP	KGAHA0850P56	All	4, 6
	1.25 mm LP	KGAHA5750125	All	4, 6
	1.30 mm LP	KGAHA5750130	All	4, 6

Control Accessories	Part Number	Used With	Notes
ECM Motor Simulator Kit	KGASD0301FMS	All	-
Advanced Product Monitor - APM	KGASD0301APM	All	-
Infinity Control User Interface	SYSTXCCUID01-V	All	-
Infinity Control Zoning User Interface	SYSTXCCUIZ01-V	All	-

IAQ Accessories		Part Number	Used With	Notes
Filter Pack (6 pack) - Washable —	16 x 25 x 1	KGAWF1306UFR	All	5
Filler Fack (o pack) - Washable	24 x 25 x 1	KGAWF1506UFR	All	5
	16-in.	EXPXXFIL0016	EZXCAB1016	3, 5
EZ-Flex Filter	20-in.	EXPXXFIL0020	EZXCAB1020	3, 5
	24-in.	EXPXXFIL0024	EZXCAB1024	3, 5
	16-in.	EXPXXUNV0016	EZXCAB1016	3, 5
EZ-Flex Filter with End Caps	20-in.	EXPXXUNV0020	EZXCAB1020	3, 5
	24-in.	EXPXXUNV0024	EZXCAB1024	3, 5
	16-in.	FILXXCAR0016	FILCABXL1016	3, 5
Cartridge Media Filter	20-in.	FILXXCAR0020	FILCABXL1020	3, 5
	24.in.	FILXXCAR0024	FILCABXL2024	3, 5
Carrier Infinity Air Purifier —	16 x 25	GAPAAXCC1625	Up to 1600 CFM	5
Carrier milling All Furnier —	20 x 25	GAPAAXCC2025	Up to 2000 CFM	5
Carrier Infinity Air Purifier Replacement Filter —	16 x 25	GAPCCCAR1625	GAPAAXCC1625-A08	5
Carrier infinity All Furnier Replacement Filter —	20 x 25	GAPCCCAR2025	GAPAAXCC2025-A08	5
Carrier Performance Air Purifier —	16 x 25	PGAPXX1625	Up to 1600 CFM	5, 7
Camer Fenomiance Air Pullier —	20 x 25	PGAPXX2025	Up to 2000 CFM	5, 7
Carrier Performance Air Purifier Replacement Filter —	16 x 25	PGAPAXXCAR1625	GAPAAXCC1625	5, 7
Carrier Ferrormance Air Furnier Replacement Filter —	20 x 25	PGAPAXXCAR2025	GAPAAXCC2025	5, 7

Notes:

- 1. CSA requires that a termination kit be used. See latest PD for pipe and kit size selection. The qualified installer or agency must use only factory-authorized kits when modifying these furnaces.
- 2. Not for use with Concentric Vent Termination Kits.
- 3. Last 2 digits of Part Number indicate filter size.
- 4. Last 2 digits of Part Number indicate orifice size.
- 5. Choose IAQ/filter assembly appropriate for the designed system airflow and static pressure. Use optional IAQ Device Duct Adapters as required.
- 6. Available from Replacement Components group.
- 7. Kit coming soon. Expected availability 2Q2012.

^{1.} Nominal 350 CFM/ton cooling airflow is delivered with SW1-5 and SW4-3set to OFF.

Set SW1-5 to ON for nominal 400 CFM/ton (+15% airflow).

Set SW4-3 to ON for nominal 325 CFM/ton (-7% airflow).

Set both SW1-5 and SW4-3 to ON for nominal 370 CFM/ton (+7% airflow).

The above adjustments in airflow are subject to motor horsepower range/capacity.

- 2. Maximum cooling airflow is achieved when switches SW2-1, SW2-2, SW2-3 and SW1-5 are set to ON, and SW4-3 is set to OFF.
- 3. All heating CFM's are when low heat rise adjustment switch (SW1-3) and comfort/efficiency adjustment switch (SW1-4) are both set to OFF.
- 4. Ductwork must be sized for high-heating CFM within the operational range of ESP. Operation within the blank areas of the chart is not recommended because high-heat operation will be above 1.0 ESP.
- 5. All airflows on 21" (533 mm) casing size furnaces are 5% less on side return only installations.
- 6. Side returns for 24.5" (622 mm) casing sizes require two sides, or side and bottom, to allow sufficient airflow at the return of the furnace.
- 7. Airflows over 1800 CFM require bottom return, two-side return, or bottom and side return; otherwise excessive watt draws may result. A minimum filter size of 20" x 25" (508 x 635 mm) is required.

MAXIMUM EQUIVALENT VENT LENGTH - FT. (M)

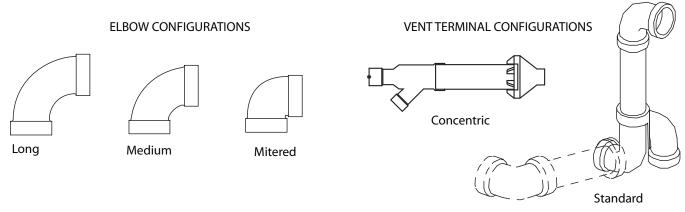

NOTE: Maximum Equivalent Vent Length (MEVL) includes standard and concentric vent termination and does NOT include elbows. Use Table 2 - Deductions from Maximum Equivalent Vent Length to determine allowable vent length for each application.

Standard Vent Termination	0	(0.0)	0	(0.0)	0	(0.0)	0	(0.0)	0	(0.0)

Venting System Length Calculations

The maximum length for each vent pipe (inlet or exhaust) equals the Maximum Equivalent Vent Length (MEVL) from Table 1 or Table 3 minus the number of elbows multiplied by the deduction for each elbow in Table 2.

Standard vent terminations and concentric vent terminations count for zero deductions.

See Vent Manufacturers' data for equivalent lengths of flexible vent piping.

DO NOT ASSUME that one foot of flexible vent pipe is equivalent to one foot of standard PVC vent pipe.

Example

A direct-vent 60,000 Btuh furnace installed at 2100 ft. (640 M) with 2-in.(51 mm) vent piping. Venting system includes, **FOR EACH PIPE**, (3) 90° long radius elbows, (2) 45° long radius elbows and a concentric vent kit.

Maximum Equivalent Vent Length				=	127 ft.	(From Table 1)
Deduct (3) 90 long radius	3	х	3 ft.	=	- 9 ft.	(From Table 2)
Deduct (2) 45 long radius	2	х	1.5 ft.	=	- 3 ft.	(From Table 2)
No deduction for Concentric Vent Kit			0 ft.	=	- 0 ft.	(From Table 2)
Maximum Vent Length				=	115 ft.	For EACH vent or inlet pipe

MAXIMUM EQUIVALENT VENT LENGTH - FT. (M) (CONTINUED)

NOTE: Maximum Equivalent Vent Length (MEVL) includes standard and concentric vent termination and does NOT include elbows.

Use Table 2 - Deductions from Maximum Equivalent Vent Length to determine allowable vent length for each application.

Table 3 – Maximum Equivalent Vent Length – Ft. (M) 4501 to 10,000 Ft. (1371 to 3048 M) Altitude

NOTES

- 1. Use only the vent pipe sizes shown for each furnace. It is NOT necessary to choose the smallest diameter pipe possible for venting.
- 2. NA Not allowed. Pressure switch will not close, or flame disturbance may result.
- 3. Total equivalent vent lengths under 10' for 40,000 BTUH furnaces from 0 to 2000 ft. (0 to 610 M) above sea level require use of an outlet choke plate . Failure to use an outlet choke when required may result in flame disturbance or flame sense lockout.
- 4. Not all furnace families include 140,000 BTUH input models.
- 5. Vent sizing for Canadian installations over 4500 ft (1370 M) above sea level are subject to acceptance by local authorities having jurisdiction.
- 6. Size both the combustion air and vent pipe independently, then use the larger size for both pipes.
- 7. Assume the two 45° elbows equal one 90° elbow. Wide radius elbows are desirable and may be required in some cases.
- 8. Elbow and pipe sections within the furnace casing and at the vent termination should not be included in vent length or elbow count.
- 9. The minimum pipe length is 5 ft. (1.5 M) linear feet (meters) for all applications.
- 10. Use 3-in. (76 mm) diameter vent termination kit for installations requiring 4-in. (102 mm) diameter pipe.

t Not all familias have those made						<u> </u>											

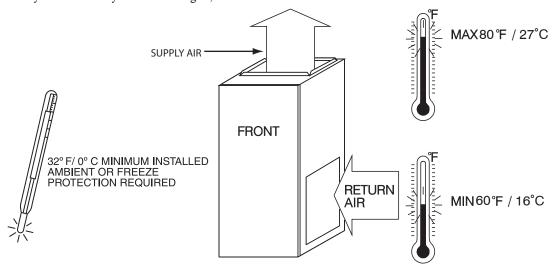

^{*} Not all families have these models.

^{*} Pipe length (ft) specified for maximum pipe lengths located in unconditioned spaces. Pipes located in unconditioned space cannot exceed total allowable pipe length calculated from Table 1 or 3.

 $[\]dagger$ Insulation thickness based on R value of 3.5 per in.

RETURN AIR TEMPERATURE

This furnace is designed for continuous return-air minimum temperature of $60^{\circ}F$ ($15^{\circ}C$) db or intermittent operation down to $55^{\circ}F$ ($13^{\circ}C$) db such as when used with a night setback thermometer. Return-air temperature must not exceed $80^{\circ}F$ ($27^{\circ}C$) db. Failure to follow these return air limits may affect reliability of heat exchangers, motors and controls.

^{*}The plenum should be constructed 1/4-in. (6 mm) smaller in width and depth than the plenum dimensions shown above.

Concentric Vent Kit

٨٥٥٥٥

A concentric vent kit allows vent and combustion-air pipes to terminate through a single exit in a roof or side wall. One pipe runs inside the other allowing venting through the inner pipe and combustion air to be drawn in through the outer pipe.

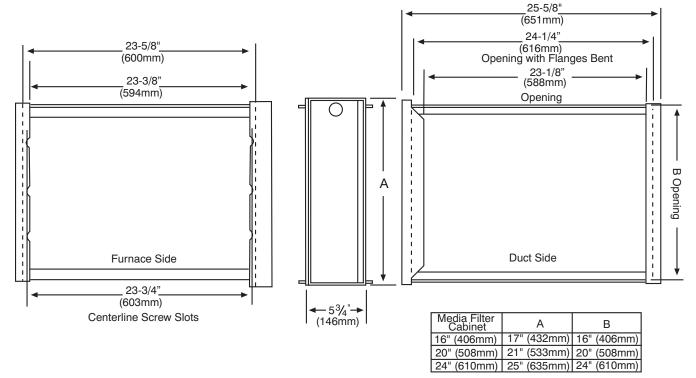

Downflow Subbase

A88202

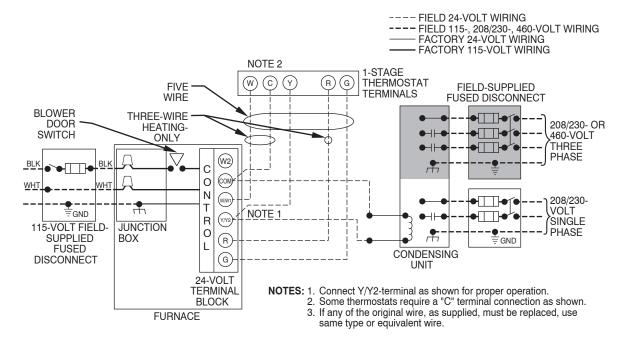

One base fits all furnace sizes. The base is designed to be installed between the furnace and a combustible floor when no coil box is used or when a coil box other than a Carrier cased coil is used. It is CSA design certified for use with Carrier branded furnaces when installed in downflow applications.

MEDIA FILTER CABINET

GUIDE SPECIFICATIONS

General

System Description

Furnish a 4-way multipoise two-stage gas-fired condensing furnace for use with natural gas or propane (factory- authorized conversion kit required for propane); furnish cold air return plenum; furnish external media cabinet for use with accessory media filter or standard filter.

Quality Assurance

Unit will be designed, tested and constructed to the current ANSI Z 21.47/CSA 2.3 design standard for gas-fired central furnaces.

Unit will be third party certified by CSA to the current ANSI Z 21.47/CSA 2.3 design standard for gas-fired central furnaces. Unit will carry the CSA Blue Star® and Blue Flame® labels. Unit efficiency testing will be performed per the current DOE test procedure as listed in the Federal Register.

Unit will be certified for capacity and efficiency and listed in the latest AHRI Consumer's Directory of Certified Efficiency Ratings. Unit will carry the current Federal Trade Commission Energy Guide efficiency label.

Delivery, Storage, and Handling

Unit will be shipped as single package only and is stored and handled per unit manufacturer's recommendations.

Warranty (for inclusion by specifying engineer)

U.S. and Canada only. Warranty certificate available upon request.

Equipment

Blower Wheel and ECM Blower Motor

Galvanized blower wheel shall be centrifugal type, statically and dynamically balanced. Blower motor of ECM type shall be permanently lubricated with sealed ball bearings, of _____hp, and have infinitely variable speed from 300-1300 RPM operating only when motor inputs are provided. Blower motor shall be direct drive and soft mounted to the blower scroll to reduce vibration transmission.

Filters

Furnace shall have	reusable-t	ype	filters.	Filt	ter shall	l be _		in
(mm) X	in. (mm).	An	access	ory	highly	effici	ent Me	dia
Filter is available as	s an option	·			Me	dia F	ilter.	

Casing

Casing shall be of .030 in. thickness minimum, pre-painted galvanized steel.

Draft Inducer Motor

Draft Inducer motor shall be two-speed design.

Primary Heat Exchangers

Primary heat exchangers shall be 3-Pass corrosion-resistant aluminized steel of fold-and-crimp sectional design and applied operating under negative pressure.

Secondary Heat Exchangers

Secondary heat exchangers shall be of a stainless steel flow-through of fin-and-tube design and applied operating under negative pressure.

Controls

Controls shall include a micro-processor-based integrated electronic control board with at least 16 service troubleshooting codes displayed via diagnostic flashing LED light on the control, a self-test feature that checks all major functions of the furnace, and a replaceable automotive-type circuit protection fuse. Multiple operational settings available, including separate blower speeds for low heat, high heat, low cooling, high cooling and continuous fan. Continuous fan speed may be adjusted from the thermostat. Cooling airflow will be selectable between 325 and 400 CFM per ton of air conditioning. Features will also include temporary reduced airflow in the cooling mode for improved dehumidification when an Infinity Control or TP-PRH edge® is selected as the thermostat.

Operating Characteristics

Heating capaci	ty snan t	oe			Btun	input;
	_ Btuh out	tput capa	icity.			
Fuel Gas Efficie	ncy shall b	e	A	AFUE.		
Air delivery sha	ll be		c	fm mir	nimum at (0.50 in.
W.C. external st	atic pressur	e.				
Dimensions s	hall be:	depth_		in.	(mm);	width
in.	(mm); heig		in. (mı	m) (casing	g only).	
Height shall	be	in.	(mm)	with	A/C co	il and
	in. (n	nm) over	all with	plenur	n.	
El4-21 D-	·	4				

Electrical Requirements

Electrical supply shall be 115	volts, 60 Hz, single-phase (nominal).
Minimum wire size shall be	AWG; maximum fuse size
of HACR-type designated of	circuit breaker shall be
amps.	

Special Features

Refer to section of the product data identifying accessories and descriptions for specific features and available enhancements.
